

LightroomToolbox Plugins

Thank you for downloading the **LightroomToolbox** plugins. The download package includes a folder named `LightroomToolbox` with the following content:

- Files `Instalacion_y_activacion.pdf` and `Installation_and_activation.pdf` : These documents contain the instructions, in Spanish and English respectively, for installing the plugins and activating the licenses. The plugins can be installed in *Demo* mode without purchasing a license. In this mode, some features or usage will be limited.
- `bordes.lrplugin` : **Bordes** plugin (version 4.0). Its purpose is to generate frames and borders around photos during the export process.
- `ComentariosEnColecciones.lrplugin` : **Comentarios en Colecciones** plugin (version 2.4.4). Allows adding comments in text format, as well as `.xlsx` and `.docx` documents, to catalog collections.
- `mosaico.lrplugin` : **Mosaico** plugin (version 1.4.4). Allows splitting a photo into rows and columns to make publishing on social media easier.
- `keywordsManager.lrplugin` : **Keywords Manager** plugin (version 3.1). Allows you to organize, maintain, and clean up the hierarchical keyword structure in Lightroom Classic. It also allows you to generate a collection tree that replicates the keywords associated with a set of photos and includes the corresponding photos.
- `ShotNotes.lrplugin` : **Shot Notes** plugin (version 1.2.4). Allows you to save text and voice notes, keywords, and GPS coordinates on your phone as you take photographs. Later, these notes are synchronized with the metadata of your photos in the Lightroom Classic catalog. **Shot Notes** is used in conjunction with an app that runs on your phone and a plugin that runs in Lightroom Classic.
- `ShotNotes.app` : **Shot Notes** app (version 1). Allows you to save text and voice notes, keywords, and GPS coordinates on your phone as you take photographs. Later, these notes are synchronized with the metadata of your photos in the Lightroom Classic catalog. **Shot Notes** is used in conjunction with an app that runs on your phone and a plugin that runs in Lightroom Classic.
- `lic` : Folder reserved for storing activation files.
- `shortcuts` : Contains the files required to manage keyboard shortcuts.

- `Installation_and_activation.pdf` and `Instalacion_y_activacion.pdf` : The installation and activation instructions in English and Spanish
- `README.pdf` and `LEAME.pdf` : The document you are currently reading and its Spanish translation.
